

BREAKER STEELS

KANGO 900/950

KANGO 900/950

| DESCRIPTION | PART NO. | LIST |
|--|-------------------|--------|
| Moil point - 380mm o/a length | K900/950-MP380 | £11.86 |
| Moil point - 450mm o/a length | K900/950-MP450 | £13.48 |
| Narrow chisel - 380mm o/a length | K900/950-NC380 | £11.86 |
| Narrow chisel - 450mm o/a length | K900/950-NC450 | £13.48 |
| 50mm wide chisel - 300mm o/a length | K900/950-S0WC300 | £20.49 |
| 75mm wide chisel - 300mm o/a length | K900/950-75WC300 | £21.57 |
| Stem for floor cleaning tool & pad 275mm o/a | K900/950-STEM | £24.80 |
| Clayspade - 100 x 165mm Blade | K900/950-CSPADE | £70.09 |
| Scutch comb holder | K900/950-SCHOLDER | £48.53 |

MOIL POINT

Drop forged from high grade steel, this Hammer Iron with heat treated work areas is used for demolition work and starting holes in the centre of a concrete slab. The most common of the demolition steels used for general breaking where there is not a requirement to control the line of fracture.

NARROW CHISEL

Narrow chisel used in a similar way to the moil point but the line of fracture is controlled along the line of the chisel end. Used on applications where it is important to have a clean edge retained on the work-piece to be broken.

WIDE CHISEL / BOLSTER CHISEL

Wide chisel or bolster chisel used in a similar way to the moil point but the line of fracture is controlled along the line of the chisel end. Used on applications where it is important to have a clean edge retained on the work-piece to be broken.

STEM Use with floor cleaning tools and pads

Stem for floor cleaning tool is available with different shank types and facilitates the use of the smaller electric tamping pads and especially the floor cleaning tool.

CLAYSPADE

Clayspade is a purpose designed blade for cutting / digging of boulder clay. The geometry facilitates the cutting action to return to an open face. If the edge is damaged during use it will destroy the natural scooping action. This tool is favoured by tunnelling contractors and companies specialising in underpinning in clay conditions. Also excellent for general garden and landscaping.

SCUTCH COMB HOLDER

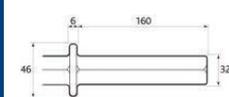

Allows scutching operations using power tools instead of hand held. Interchangeable scutch ends mean no sharpening is necessary. Can also be used with 'droves'.

HOW TO SELECT YOUR DURO BREAKER STEEL

1. Choose the kind of application you need to undertake and therefore the breaker steel type you need to achieve.
2. Then select the machine type you will be using - pneumatic or electric

FOR EXAMPLE:
